

APPENDIX T

SAMPLE REPORTS – MCAS-ALT

Spring 2015 MCAS Alternate Assessment (MCAS-Alt) Parent/Guardian Report

What is the MCAS Alternate Assessment (MCAS-Alt)?

The MCAS-Alt is a collection of student work that measures a student's achievement of the academic learning standards. For each student taking the MCAS-Alt, the student, the student's teacher, and other adults who work with the student, develop a portfolio over the course of the school year in one or more subjects. The portfolio may include samples of work, video, photographs, charts of the student's performance and progress in the subject being assessed, and other information. Each section of the portfolio is called a "strand" and corresponds with a strand, domain, or conceptual category of the curriculum framework in that subject.

Who must take MCAS?

All students in grades 3-10 who attend publicly funded school programs, including students with disabilities and those who are English language learners, are required to participate in MCAS. A relatively small number of students with disabilities must take the MCAS-Alt when they are unable to take regular MCAS tests, even with accommodations.

The decision to participate in an alternate assessment in one or more subjects is made by the student's IEP team or included in the student's 504 plan. Most students who take the alternate assessment receive individualized instruction that has been substantially modified from what other students receive.

Why include students with disabilities in the MCAS and MCAS-Alt?

It's the law. State and federal laws require the participation of all students in statewide assessments. The alternate assessment allows students with significant disabilities who cannot take regular MCAS tests to "show what they know" and to receive instruction at a level that is challenging and attainable.

The MCAS helps to determine how much a student is learning. An MCAS-Alt portfolio shows what the student has learned during the school year. Scores provide accurate and detailed feedback that can be used to identify challenging goals and instruction for the following school year.

Including all students in MCAS ensures that all students will be taught. Counting the results of students who take the MCAS-Alt means that those students are more likely to be considered when resource decisions are made.

Learning improves and expectations are raised as a result. Evidence indicates that students learn more than expected when they are engaged in instruction based on the states' learning standards, and in assessments based on those learning standards.

How are the MCAS-Alt results used?

MCAS-Alt results should be used by the school and the IEP team to

- make decisions about a student's daily instruction
- identify challenging academic goals and plan instruction for a student for the following year
- measure a student's progress in achieving the academic standards in the Massachusetts Curriculum Frameworks
- allocate sufficient school resources for a student's education
- establish whether the school and district are making progress in educating students with disabilities.

Can students meet the state's graduation requirement and earn a diploma if they participate in the MCAS-Alt?

A student must meet both state and local requirements in order to graduate. However, only a small number of students who participate in the MCAS-Alt have been able to meet the state's graduation requirement. In order to meet the state's graduation requirement through the MCAS-Alt, a student must submit a "competency portfolio" that

- demonstrates knowledge and skills at a grade 10 level of performance
- includes independently produced work samples that address the required high school learning standards.

These requirements are described in the *Educator's Manual for MCAS-Alt*, which is available at www.doe.mass.edu/mcas/alt/resources.html.

Letter from the Commissioner

Dear Parent or Guardian:

Enclosed are your child's scores from the 2015 MCAS Alternate Assessment (MCAS-Alt). As you are aware, all students must participate in the MCAS. Your child took the MCAS-Alt, as indicated in his or her IEP or 504 plan.

The MCAS-Alt is a collection of your child's work, based on the Massachusetts Curriculum Frameworks, which is compiled in a portfolio and submitted by the school to the state each April. Your child's school was required to invite you to review the portfolio before it was submitted. Since your support is extremely important, I hope you were able to view the portfolio and see your child's academic progress.

I ask that you meet with your child's teacher to help you understand the meaning of these results, and to discuss your child's goals for the coming school year.

I would also like to acknowledge the hard work of your child's teacher in creating the portfolio and contributing to this important and worthwhile effort.

Sincerely,

Mitchell D. Chester, Ed.D.

Commissioner of Elementary and Secondary Education

Purposes of the MCAS-Alt

The MCAS-Alt is an assessment designed for students with significant disabilities that measures achievement in English Language Arts and Mathematics in grades 3-8 and 10, and in Science and Technology/Engineering in grades 5, 8, and high school. As is true for students taking the standard MCAS test, your child is expected to demonstrate knowledge of the academic learning standards in the Massachusetts Curriculum Frameworks.

The purpose of the MCAS-Alt is to make sure schools are teaching the state's learning standards to *all* students, regardless of their disability, and to help explore students' capabilities, even when they cannot show what they know on a test.

Achievement Level Descriptors

A score of *Needs Improvement*, *Proficient*, or *Advanced* on the high school MCAS-Alt is required to meet the state's graduation requirement.

Advanced	Students at this level demonstrate a comprehensive understanding of challenging grade-level subject matter and provide sophisticated solutions to complex problems.
Proficient	Students at this level demonstrate a solid understanding of challenging grade-level subject matter and solve a wide variety of problems.
Needs Improvement	Students at this level demonstrate a partial understanding of grade-level subject matter and solve some simple problems.
Progressing	Students at this level demonstrate a partial understanding below grade-level expectations of selected learning standards and core knowledge topics contained in the Massachusetts curriculum framework for the content area. Students are steadily learning new knowledge, skills, and concepts. Students require minimal prompting and assistance, and their performance is basically accurate.
Emerging	Students at this level demonstrate a simple understanding below grade-level expectations of a limited number of learning standards and core knowledge topics contained in the Massachusetts curriculum framework for the content area. Students require frequent prompting and assistance, and their performance is limited and inconsistent.
Awareness	Students at this level demonstrate very little understanding of learning standards and core knowledge topics contained in the Massachusetts curriculum framework for the content area. Students require extensive prompting and assistance, and their performance is mostly inaccurate.
Incomplete	Insufficient evidence and information was included in the portfolio to allow an achievement level to be determined in the content area.

Your Child's Achievement Level (✓)

English Language Arts	Mathematics	Science & Technology/ Engineering
✓	✓	✓

The top section of this report shows your child's overall achievement level in the content area of the alternate assessment. The MCAS Alternate Assessment (MCAS-Alt) portfolio was scored in each area shown below. Scores in *Level of Complexity*, *Demonstration of Skills and Concepts*, and *Independence* were combined to give the overall achievement level.

MCAS-Alt Scoring Areas and Your Child's Scores

Level of Complexity - How your child addressed the learning standards in each subject	English Language Arts			Mathematics					Science & Technology/Engineering			
	Language	Reading	Writing	Functions	Geometry	Statistics and Probability	Number and Quantity	Algebra	Biology 1	Biology 2	Biology 3	Biology 4
5 - Student addresses a broad range of curriculum framework learning standards (three or more) at grade-level expectations in this strand.												
4 - Student addresses a narrow sample of curriculum framework learning standards (one or two) at grade-level expectations in this strand.												
3 - Student addresses curriculum framework learning standards that have been modified below grade-level expectations in this strand.	✓	✓	✓		✓	✓		✓	✓	✓		
2 - Student primarily addresses social, motor, and communication "access skills" during instruction based on curriculum framework learning standards in this strand.												
1 - Portfolio strand reflects little or no basis in, or is unmatched to, curriculum framework learning standard(s) required for assessment.												
Demonstration of Skills and Concepts - The percentage of accurate (correct) responses												
4 - Student's performance is accurate and is of consistently high quality in this strand (76-100% accurate).	✓	✓	✓		✓	✓		✓	✓	✓		
3 - Student's performance is mostly accurate and demonstrates some understanding in this strand (51-75% accurate).												
2 - Student's performance is limited and inconsistent with regard to accuracy and demonstrates limited understanding in this strand (26-50% accurate).												
1 - Student's performance is primarily inaccurate and demonstrates minimal understanding in this strand (0-25% accurate).												
M - The portfolio strand contains insufficient information to determine a score.												
Independence - The amount of assistance your child received												
4 - Student requires minimal verbal, visual, and physical assistance to demonstrate skills and concepts in this strand (76-100% independent).	✓	✓	✓		✓	✓		✓	✓	✓		
3 - Student requires some verbal, visual, and physical assistance to demonstrate skills and concepts in this strand (51-75% independent).												
2 - Student requires frequent verbal, visual, and physical assistance to demonstrate skills and concepts in this strand (26-50% independent).												
1 - Student requires extensive verbal, visual, and physical assistance to demonstrate skills and concepts in this strand (0-25% independent).												
M - The portfolio strand contains insufficient information to determine a score.												
Self-Evaluation - Your child's awareness of his or her performance												
2 - Student self-corrects, monitors, sets goals, and reflects in this content area - multiple examples of self-evaluation were found in this strand.	✓	✓	✓		✓	✓		✓	✓	✓		
1 - Student infrequently self-corrects, monitors, sets goals, and reflects in this content area - only one example of self-evaluation was found in this strand.												
M - Evidence of self-correction, task-monitoring, goal-setting, and reflection was not found in the student's portfolio in this content area.												
Generalized Performance - The number of approaches used by your child to demonstrate knowledge and skills												
2 - Student demonstrates knowledge and skills in multiple contexts, or uses multiple approaches and/or methods of response and participation in this strand .	✓	✓	✓		✓	✓		✓	✓	✓		
1 - Student demonstrates knowledge and skills in one context, or uses one approach and/or method of response and participation in this strand .
